PROFESSIONAL SUMMARY

iOS engineering leader with over 10 years of experience building, shipping, and maintaining high-performance consumer mobile applications. Strong background in technical leadership, architecture discussions, code quality, CI/CD delivery, and cross-functional execution in Agile environments. Hands-on expert in Swift, UIKit, and SwiftUI, Combine, Swift Concurrency, actors, and MVVM experience with deep experience in testing practices, code reviews, and scalable mobile engineering workflows. Proven record leading engineers and mentoring early-career talent through structured feedback, growth planning, and day-to-day technical coaching. Domain experience includes automotive e-commerce, media/airline, insurance, and banking applications serving large user bases.

CORE SKILLS

- Engineering Leadership: Team mentoring, performance feedback, stakeholder communication, cross-functional planning, roadmap contribution, Agile/Scrum ceremonies.
- iOS Development: Swift, SwiftUI, UIKit, Combine, RxSwift, Objective-C, Xcode, mobile architecture patterns like async-await, swift-concurrency, SwiftData, GraphQL integration, REST integration.
- Quality and Delivery: Code reviews, Unit testing, UI testing, CI/CD pipelines, Release Management, maintainability and performance focus.
- DevOps and Tooling: Fastlane, Jenkins, Azure DevOps, App Center, Git, Scandit, New Relic, Instabug, Mixpanel, Firebase.
- Collaboration: Partnering with Product, QA, Backend, Design, and Architecture teams; technical communication for both technical and non-technical audiences.

PROFESSIONAL EXPERIENCE

LEAD SOFTWARE ENGINEER (iOS) | ACV AUCTIONS | Toronto, Canada | Aug 2019 - Present

Scale & Impact

- ACV iOS **marketplace app** is B2B, where the end users are Dealership employees and ACV vehicle inspectors.
- **Reduced app launch time by 30%** (3.6s → 2.0s) through startup optimization initiatives, including lazy dependency initialization, asynchronous workflows, and launch sequence refactoring.
- Improved application stability by increasing **crash-free sessions from 98.4% to 99.7%** through proactive monitoring, root-cause analysis, and targeted quality improvements.
- Led the effort to solve the **app memory leak** issues and **phone overheating** issues for users of extreme heat regions.

Architecture & Ownership

- Audited and led the **migration of MVC to MVVM** architecture.
- Led & owned user flows like MyACV, Post-Winning-Finalization, Transportation, and Payment experiences, MarketPlace Saved Searches, etc.
- Drove design reviews, establishing scalable, maintainable, and customer-centric mobile solutions aligned with long-term platform objectives.
- Demonstrated Clean Architecture in SwiftUI to the team.

Modern iOS

- Leveraged modern iOS technologies including Swift, UIKit, **SwiftUI, Combine, async-await and Swift Concurrency** to accelerate feature development and enhance application performance.

Performance & Reliability

- Use of **async-await** to call multiple long running api calls concurrently to prevent dead locks between the calls.
- Fixed multiple (SIGABRT, SIGSEGV, Network call missing coding-keys) crash reports provided by **Datadog-RUM or New-Relic-APM**.

Leadership

- Enforced team of 6 engineers to maintain **PR code coverage from >50% to >70%**.
- **Onboarded & mentored the ~8 juniors**, on their tasks & blockers.
- **Led many discussions** like Perl migrations **with cross platform teams including Staff and Principal engineers**.
- Led iOS team **Agile SCRUM ceremonies** and **Production Release documents/activities/meetings**.
- Providing **constructive code review** feedback to the team.
- Authored **many technical design documents** like Migration of CoreData to Swiftdata, Move away from UserDefaults to Keychain access or Xcode Cloud, Integration of Salesforce Chat POC, Clean Architecture in SwiftUI POC, etc.
- Contributed to **hiring** and team scaling efforts by conducting **technical interviews, evaluating candidates**, and helping maintain a high engineering talent bar.
- **Partnered** with product managers, designers, backend engineers, and **business stakeholders** to define priorities, align roadmaps, and successfully execute strategic initiatives.

AI adoption

- Championed adoption of AI-assisted engineering workflows using tools such as **Claude and GitHub Copilot**, establishing best practices that significantly improved developer productivity, code quality, delivery efficiency across the team of 6 engineers and increase their **efficiency to ~4X**.

CONSULTANT | AVANADE | Toronto, Canada | Dec 2017 - Mar 2019

- Delivered iOS solutions using Swift and UIKit with strong emphasis on code quality, code reviews, and CI/CD best practices.
- Led a team of 3 iOS engineers on the **Tim Hortons** mobile platform, driving technical delivery and cross-functional collaboration across architecture, backend, QA, and product teams. Contributed to a high-scale consumer application serving approximately **1–1.7 million DAU and 5.8 million MAU**, with a focus on performance, reliability, and customer experience. With Appstore rating as 4.7/5.
- Supported **Air Canada** mobile applications by implementing and maintaining customer-facing features in a production environment. This application had **160K-500K daily active users (DAU) and 2-4 million monthly active users (MAU)**. With Appstore rating as 4.8/5.
- Documented DevOps strategy to improve mobile build and release workflows using Azure DevOps and App Center.
- Contributed to Agile ceremonies and iterative delivery, aligning engineering output with client and business expectations.

TECHNICAL SPECIALIST / PROJECT LEAD | SYNTEL | Toronto, Canada | May 2017 - Nov 2017

- Led and coordinated delivery of a customer-facing **AllState Insurance Canada** iOS application ground-up, in close collaboration with distributed stakeholders. This application had **300K-1.5 million daily active users (DAU) and 2-4 million monthly active users (MAU)**. With **4.8 star rating** on Appstore.
- Implemented iOS features with a Test-Driven Development approach and strong emphasis on engineering fundamentals.
- Wrote and maintained tested code using unit, UI, and integration testing practices.
- Implemented code to provide AODA/Accessibility compliances, Internationalization.
- Diagnosed technical issues, communicated trade-offs, and documented architecture and implementation decisions.

SENIOR CONSULTANT | CGI | Toronto, Canada | Sep 2016 - Apr 2017

- Designed and developed iPad user interfaces with UIKit, Auto Layout, and Interface Builder for **BMO E-Sign iPad** application.
- Built maintainable iOS code using MVC, **protocol/delegate patterns**, **multithreading**, and unit testing.
- Integrated enterprise networking interfaces including SOAP and REST APIs for production use cases.

SOFTWARE PROGRAMMER | CANAMEX COMMUNICATION CORPORATION | Markham, Canada | Sep 2014 - Jun 2016

- Built iPhone messaging functionality from wireframes to implementation in Xamarin.iOS and Swift.
- Implemented AES-256 based local data encryption with SQLite-backed storage.
- Worked with APNS and local notifications for real-time user messaging experiences.

SOFTWARE DEVELOPER (CO-OP) | BLACKBERRY LIMITED | Ottawa, Canada | Sep 2013 - May 2014

- Delivered features and issue fixes for BlackBerry 10 projects including Radio UI Manager, Mobile Network Settings, and Universal Search.
- Contributed to **BlackBerry Voice Assistant** via Natural Language Processing Machine Learning model embedded in all Blackberry Operating System by building UI and integrating platform APIs and social APIs.
- Developed components using C++, Qt/QML, and NLP-driven assistant workflows.

EDUCATION

MSc, Information Technology | London Metropolitan University, United Kingdom | Dec 2016 | Graduated with Distinction

Diploma, Computer Programmer | Georgian College, Canada | Aug 2014 | Graduated with Honors

Bachelor of Computer Engineering | Pune University, India | May 2011

CERTIFICATIONS

Certified Scrum Master, Scrum Alliance (2021)

Microsoft Azure Fundamentals (2019)

Machine Learning, Coursera (2018)

Xamarin Mobile Certification (2016)

ADDITIONAL TECHNICAL TOOLS

Languages: C#, C++, Java, Kotlin, JavaScript, HTML5, CSS3, PHP

iOS Frameworks/Libraries: Fastlane, QuickSpec, Nimble, PromiseKit, CoreData, XCTest, OHHTTPStubs, EarlGrey, Alamofire, KeychainAccess

Tools: Firebase, AirWatch, PubNub, Google Ad Manager

Platforms: Xcode, Android Studio, Xamarin Studio, Visual Studio

SELECT INDUSTRY APPLICATION EXPERIENCE

Automotive E-Commerce: ACV Auctions

Travel and Media: Air Canada, Tim Hortons

Insurance: Allstate Insurance

Banking: Bank of Montreal
